Pacific Northwest National Laboratory –
an Economic Engine for Washington State

The U.S. Department of Energy’s Pacific Northwest National Laboratory (PNNL) is known for its impressive record of scientific and technological contributions to the nation. While our focus remains on addressing many of the nation’s most pressing issues in science, energy, the environment, and national security, we also deliver a less obvious but significant benefit: economic impact in the state of Washington. We invite you to discover more about PNNL’s FY16 economic impact here and in the complete report at www.pnnl.gov/about/facts.asp.
