

# Hurricanes and Hurricane Risk in a Changing Climate

Frontiers in Global Change  
Seminar Series

Presented by...

Professor  
Kerry Emanuel

Cecil & Ida Green  
Professor of Atmospheric Science  
Massachusetts Institute of Technology

## Abstract:

In this talk, I will review hurricanes and the various kinds of hazards they present to us, and go on to talk about how geology, history, and physics can all be used to help assess the risk of these hazards today and going forward, as our climate warms.

Please join us for a meet and greet opportunity  
with Professor Emanuel after the seminar.  
~Refreshments will be served~

Date: October 27

Location: EMSL  
Auditorium

Time: 10:00 AM
