SBIR/STTR NEWS AND INFORMATION

- NSF FY-2011 STTR Released

The National Science Foundation (NSF) posted their FY-2011 STTR solicitation on their SBIR/STTR website (<http://www.nsf.gov/eng/iip/sbir/index.jsp>) on August 2, 2010. NSF will begin accepting proposals on October 17, 2010 and close on November 17, 2010.

The STTR Topic for this solicitation is: Digital Gaming in Education (DGE). As indicated in the solicitation, 'in recent years, digital gaming has grown exponentially in its ability to entertain via digital worlds, knowledge dissemination, and in skill development. Today digitally experienced persons learn differently, presenting new business opportunities for small business entrepreneurs.' See the solicitation for additional details, including descriptions of the subtopics:

Digital Gaming and Education for Learning

Informal (I)

Formal (F)

Digital Gaming in Education for Culture and Society

Cross Cultural Dialogue and Discoveries (CDD)

Platforms for Healthy Living (PHL)

For more information regarding the NSF SBIR/STTR program, contact Glenn H. Larsen, Program Director, at (703) 292-8050, or email glarsen@nsf.gov.

- USDA SBIR Impact -- July 2010

The U.S. Department of Agriculture (USDA) FY 2011 SBIR Solicitation deadline is only three weeks away. For those who are in the process of preparing to submit a proposal, it may be useful to view the July 2010 issue of 'SBIR Impact' which was recently posted on the USDA SBIR website (<http://www.csrees.usda.gov/funding/sbir/sbir.html>). SBIR Impact is a quarterly newsletter for small businesses interested in the USDA-SBIR program and for institutions and organizations that support the small business community and rural America.

Included in this issue is a grants.gov submission reminder and the following note: 'It is recommended that applicants begin submitting their completed application at least one day prior to the deadline to allow for

unforeseen problems or delays.’ It is a good idea to begin much sooner than that, however (see the tip from the Greenwoods below).

Also included in the newsletter is notices that FY10 Phase II reviews are complete and funding recommendations have been made; Abstracts for all the FY10 funded Phase I projects will soon be posted on the SBIR website; plans for New Phase I Project Directors, Phase I Commercialization, and Commercialization Assistance Training; a USDA Success Story profiling Stratacor, Inc., from Richmond, California; and reminders for Grant Completion Requirements, Quarterly Financial Reports, Changes in Contact Information, and Acknowledging SBIR Funding.

-- SBIR Proposal Writing Tip: Grants.gov Submissions

The following proposal writing tip was provided by Gail & Jim Greenwood. Past SBIR proposal writing articles written by the Greenwoods are available on the Greenwood Consulting Group, Inc. (GCGI) web site at www.g-jgreenwood.com.

SBIR Proposal Writing Basics: Submit Grants.gov Proposals Early...or Else

Copyright© 2010 by Greenwood Consulting Group, Inc.

With Phase 1 and 2 grant proposals to the National Institutes of Health (NIH) SBIR/STTR programs due last week, we have once again seen applicants being tripped up by grants.gov. Grants.gov, aka electronic submission process from Hades, is the process required by SBIR/STTR grant agencies such as NIH, Department of Energy (DOE), and Department of Agriculture (USDA). Grants.gov was a noble experiment to standardize the grant proposal submission process. It is complicated, it is cumbersome, and despite several years of revisions and massaging, it continues to have odd and unexpected idiosyncrasies and peculiarities that few normal people understand.

Our goal here is not to beat up grants.gov. It is to give you what seems like an obvious bit of advice: if you are required to use grants.gov to submit your SBIR/STTR proposal (and it is required at NIH, DOE and USDA), then you better submit your proposal AT LEAST several days in advance of the deadline to make sure it goes through.

Those of you who are planning to submit a proposal to DOE and/or USDA this fall need to build into your proposal preparation timeline a submission date reflecting this. Then, if something goes awry, you have some time to figure it out, consult others, and maybe even have a chance of contacting one of the grants.gov gurus via phone or email to pinpoint the problem and get it resolved before the submission deadline. But if you wait until the last minute to upload your proposal through grants.gov, and you have problems that you can't resolve before the agency's submission deadline, then you are sure-out-of-luck, because the agencies do not allow a late submission just because you had an issue with grants.gov. If you are one of the folks we spoke with who missed the August 5th NIH deadline because of a grants.gov issue, then the good news is you can try again for the December 5th deadline--but if you are submitting to DOE or USDA, those agencies only have one due date per year, so if you miss the upcoming one, you will have to wait until late 2011 to retry.

“Good advice for those newbies,” you are thinking, “but I am a long-time user of grants.gov, have it all figured out, and therefore can shoot my proposal in 29 minutes before the deadline.” Good luck with that: they are constantly “improving” grants.gov, and you are risking that one of those improvements will conflict with your knowledge and experience. Therefore, regardless of your level of grants.gov expertise, we still suggest you submit your proposal several days in advance of the agency's deadline to make sure you do not become yet-another victim of grants.gov and its peculiarities.
