Hanford Site Annual Treatability Studies Report

Calendar Year 2002

RECEIVED
MAR 17 2003
EDMC

United States
Department of Energy
Richland, Washington

Approved for Public Release

Summary

This report provides information required to be reported annually by the Washington Administrative Code (WAC) 173-303-071 (3)(r)(ii)(F) and (3)(s)(ix) on the treatability studies conducted on the Hanford Site in 2002. These studies were conducted as required by WAC 173-303-071, "Excluded Categories of Waste," sections (3)(r) and (s).

Unless otherwise noted, the waste samples were provided by and the treatability studies were performed for the U.S. Department of Energy, Richland Operations Office, P.O. Box 550, Richland, Washington 99352. The U.S. Environmental Protection Agency identification number for these studies is WA7890008967.

NA Not Applicable

(1) SRTC strategy for Hanford WTP Hazardous Waste Treatability Studies - To permit a series of multiple treatability studies to ensue while still observing the one year time frame for analytical material, the programs utilize archiving capability between studies. The treatability studies themselves will not exceed one year.

Recordkeeping will:

- Count the amount of "as-received" material in archival storage against SRTC's total storage quantity
- Document residues returned to Hanford and identify the quantity of original "as-received" material
- Maintain the amount of "as-received" material in a treatability study in accordance with 261.4(f)(3).

(2) Test programs applicable to material shipped in CY 2002 are underway. The quantity of residues generated as a result of these programs when they are generated, their return dates, and final disposition are therefore TBD.

(3) Savannah River Technology Center (SRTC) laboratories, Building 773A, Aiken, S.C. 29802 (Lab No. 1890008989)

(4) Amount and date of sample residue shipped to Hanford Site for disposal.

(5) Amount and date of sample shipped to SRTC for testing.

(6) Actual amounts reported may not match due to sample preparation and analytical methods, inventory management requirements, and waste disposal activities.

6. Generator Status Required - Indicate the facility's generator status for 2002 by checking the appropriate box. If you changed from last year, use the Comment Section (#9, below) to explain.

- ☒ Large Quantity Generator (LQG) ☐ Small Quantity Generator (SQG)
☐ Medium Quantity Generator (MQG) ☐ No Regulated Waste Generated

7. Electronic Data Submittal - If submitting data electronically, indicate your method of submission. VF must be submitted on paper.

- ☒ Disk(s) Included ☐ Data submitted by e-mail

8. Waste Management Activities - Check boxes below ONLY if they apply to your site

8a. Transportation Activity (requires prior notification)

- ☐ Transporter for your own waste
☐ Transporter for commercial purposes
☐ Transfer facility
Mode of Transportation

- ☐ Air
☐ Rail
☐ Highway
☐ Water

☐ Other - specify: _____

8b. Treatment, Storage, Disposal, Recycling (TSDR) Facility (requires permit)

☒ For waste generated at this site

☒ For waste generated by other facilities

Which of the Following RCRA permitted activities occur at this facility?

- ☒ Treatment
☒ Disposal
☒ Storage
☐ No longer RCRA-TSD active

8c. ☐ 24 Hour Immediate Recycler (commercially receives off-site waste)

8d. Used Oil Fuel Marketer

- ☐ Directs shipment or used oil to used oil burner
☐ First claims the used oil meets the specifications

8e. Used Oil Burner - Indicate type(s) of combustion device(s)

- ☐ Utility boiler
☐ Industrial furnace
☐ Industrial boiler

8f. Used Oil Transporter - Indicate type(s) of activity(ies)

- ☐ Transfer facility
☐ Transporter

8g. Used Oil Processor/Re-refiner - Indicate type(s) of combustion device(s)

10. Certification

The following must be signed by authorized representative of the company/agency. This certification language is required under EPA's Biennial Report. Ecology is required to implement reporting requirements at least as stringent as those in that report.

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

Subject: Dangerous Waste Report 2002

Mr.. Chapin,

In response to our telephone conversation earlier today I am confirming that the Generator Certification for Generator Group 440MO (The FFTF Project) received from Terri Mars, SWITS Data Management Team, and the data that I submitted for the Annual Dangerous Waste Report contain the same data. You can consider the Dangerous Waste Report submitted by The FFTF Project to be correct and complete.

EXECUTIVE SUMMARY

The Hanford Facility Annual Dangerous Waste Report (ADWR) is prepared to meet the requirements of Washington Administrative Code Sections 173-303-220, Generator Reporting, and 173-303-390, Facility Reporting. In addition, the ADWR is required to meet Hanford Facility RCRA Permit Condition I.E.22, Annual Reporting. The ADWR provides summary information on dangerous waste generation and management activities for the Calendar Year for the Hanford Facility EPA ID number assigned to the Department of Energy for RCRA regulated waste, as well as Washington State only designated waste and radioactive mixed waste. The Solid Waste Information and Tracking System (SWITS) database is utilized to collect and compile the large array of data needed for preparation of this report. Information includes details of waste generated on the Hanford Facility, waste generated offsite and sent to Hanford for management, and other waste management activities conducted at Hanford, including treatment, storage, and disposal. Report details consist of waste descriptions and weights, waste codes and designations, and waste handling codes. In addition, for waste shipped to Hanford for treatment and/or disposal, information on manifest numbers, the waste transporter, the waste receiving facility, and the original waste generators are included. In addition to paper copies, electronic copies of the report are also transmitted to the regulatory agency.
