# HANFORD SITE

## ENVIRONMENTAL SURVEILLANCE DATA REPORT

*for Calendar Year 2005*

## DISCLAIMER

This report was prepared as an account of work sponsored by an agency of the United States Government. Reference herein to any specific commercial product, process, or service by trade name, trademark, manufacturer, or otherwise does not necessarily constitute or imply its endorsement, recommendation, or favoring by the United States Government or any agency thereof, or Battelle Memorial Institute. This report is a summary of major or significant activities occurring at the Hanford Site only, and is not a full disclosure of all details associated with Hanford-related activities, nor a substitute for legally required information subject to reporting requirements regarding releases, violations, etc.

PACIFIC NORTHWEST NATIONAL LABORATORY

UNITED STATES DEPARTMENT OF ENERGY

*under Contract DE-AC05-76RL01830*

Printed in the United States of America

May be available to DOE and DOE contractors from the  
Office of Scientific and Technical Information,  
P.O. Box 62, Oak Ridge, TN 37831-0062;  
ph: (865) 576-8401  
fax: (865) 576-5728  
email: [reports@adonis.osti.gov](mailto:reports@adonis.osti.gov)

Available to the public from the National Technical Information Service,  
U.S. Department of Commerce, 5285 Port Royal Rd., Springfield, VA 22161  
ph: (800) 553-6847  
fax: (703) 605-6900  
email: [orders@ntis.fedworld.gov](mailto:orders@ntis.fedworld.gov)  
online ordering: <http://www.ntis.gov/ordering.htm>

The cover photo of lupine on the Hanford Site is from Lockheed Martin Information Technology, Richland, Washington. Rattlesnake Mountain is in the background. The cover design is by SB Neely, Pacific Northwest National Laboratory, Richland, Washington.

This document was printed on recycled paper.

## **Hanford Site Environmental Surveillance Data Report for Calendar Year 2005**

L. E. Bisping

September 2006

Prepared for  
the U.S. Department of Energy  
under Contract DE-AC05-76RL01830

Pacific Northwest National Laboratory  
Richland, Washington 99352

## Summary

Environmental surveillance on and around the Hanford Site, located in southeastern Washington State, is conducted by the Pacific Northwest National Laboratory (PNNL), which is operated by Battelle for the U.S. Department of Energy. The data collected provide a historical record of radionuclide and radiation levels attributable to natural causes, worldwide fallout, and Hanford operations. Data were also collected to monitor several chemicals and metals in Columbia River water, sediment, and wildlife. For more information regarding the 2005 sampling schedule for the Surface Environmental Surveillance Project (SESP) and Drinking Water Monitoring Project, refer to *Hanford Site Environmental Surveillance Master Sampling Schedule for Calendar Year 2005* (PNNL-15003).

The PNNL publishes an annual environmental report for the Hanford Site each calendar year. The *Hanford Site Environmental Report for Calendar Year 2005* (PNNL-15892) describes the site mission and activities, general environmental features, radiological and chemical releases from operations, status of compliance with environmental regulations, status of programs to accomplish compliance, site cleanup and remediation efforts, and environmental monitoring activities and results. Sections of the annual environmental report include tables and summaries of offsite and onsite environmental surveillance data collected by the PNNL during 2005. This data report contains the actual raw data used to create those tables and summaries. In addition to providing raw data collected during routine sampling efforts in 2005, this data report also includes Columbia River shoreline spring data collected by the PNNL Groundwater Performance Assessment Project and data from collaborative studies performed by the PNNL during 2005 under partial support by the SESP. Some analytical results were not received in time to include in this report or changes may have occurred to the data following publication.

For further information regarding 2005 Hanford Site environmental management, cleanup activities, and compliance issues, refer to *Hanford Site Environmental Report for Calendar Year 2005* (PNNL-15892), online at <http://hanford-site.pnl.gov/envreport>, or contact T. M. Poston, Pacific Northwest National Laboratory, P.O. Box 999, Richland, Washington 99352 ([ted.poston@pnl.gov](mailto:ted.poston@pnl.gov)).

## Acronyms

CFS	cubic feet per second
CRDL	contract required detection limit
DOH	Department of Health (Washington State)
ERA	Environmental Resource Associates
GPS	global positioning system
HEIS	Hanford Environmental Information System
HRM	Hanford river marker
IDL	instrument detection limit
LCS	laboratory control sample
LLD	lower level of detection
LRB	laboratory record book
MAPEP	Mixed Analyte Performance Evaluation Program
MDA	minimum detectable activity
MDL	method detection limit
PNNL	Pacific Northwest National Laboratory
PQL	practical quantitation limit
QC	quality control
RCT	Radiation Control Technologist
RDL	required detection limit
SESP	Surface Environmental Surveillance Project
STL	Severn Trent Laboratories
TLD	thermoluminescent dosimeter
USGS	United States Geological Survey

# Introduction

The following sections provide tables of data on which the Pacific Northwest National Laboratory's (PNNL's) environmental surveillance summary information in the *Hanford Site Environmental Report for Calendar Year 2005* (PNNL-15892) was based. Information that may help the reader to understand these data tables is provided on these introductory pages.

## General Information

Some degree of inherent uncertainty is associated with any analytical measurement. The 2-sigma counting error captures the uncertainty associated with the counting of radiological emissions and sample counting geometry. For samples that are prepared or manipulated in the laboratory prior to counting, the total analytical error includes both the counting error and the uncertainty connected with sample preparation and chemical separations. For samples that are not manipulated in the laboratory before counting, the total analytical error only accounts for the uncertainty associated with counting the sample and weighing the sample. The uncertainty associated with samples that are analyzed but not counted includes only the sample preparation and chemical separations uncertainty.

Due to analytical difficulties, a significant number of enriched tritium (Lo H-3) results for water and wine samples and iodine-129 results for water and milk samples were not available at the time this report was published. These values will be reported in the 2006 data report.

## External Radiation Data

The thermoluminescent dosimeter (TLD) readings in this data volume are in milliroentgens per day (mR/day) and have been converted to mrem/year for presentation in the annual report (PNNL-15892).

## Column Headings and Heading Definitions

The following are the column headings and heading definitions used in the data tables in this document. With the exception of the column headings LLD, Relative % Difference, Replicate ID, and Replicate Value reported in the Quality Assurance section of this report, the column headings below are presented as they appear in the Hanford Environmental Information System (HEIS 1989) database, which is a repository for data gathered during environmental surveillance activities at the Hanford Site.

<b>COLUMN HEADING</b>	<b>DEFINITION</b>
ANAL UNITS RPTD	Analytical units reported are the units in which the value reported was originally reported.
COLL MTHD	Collection method is used to denote the type of method used for surface water (SW) collections:  FILTER      Filter material of cloth or paper RESIN      Resin material for collecting cations and anions from water
CON SHORT NAME	Constituent short name for the specific radiological or chemical compound or physical parameter.
COUNTING ERROR	The 2-sigma counting error for radioanalytical results only.
DIST CLASS	Distant classification is the location of the sampling site relative to the Hanford Site (Onsite [site-wide], Offsite, Community, Distant, Perimeter, River_Shoreline). This field not used consistently by OWNER ID PNLGW (see page xii).
FILTERED FLAG	Filtered flag is only applicable to groundwater and surface-water samples. The field is set to 'Y' (Yes) if the sample was filtered at the time of collection and 'N' (No) if the sample was not filtered at the time of collection.
FLOW RATE	Columbia River daily average flows below Priest Rapids Dam.
FLOW RATE UNITS	Columbia River flow in cubic feet per second (CFS).
LAB QUALIFIER	Lab qualifier identifies issues that could impact the quality of the value reported. Qualifiers that apply to the 2005 data include:  B      For inorganics, the analyte was detected at a value less than the contract required detection limit (RDL), but greater than or equal to the instrument detection limit (IDL) or method detection limit (MDL). For organics, the analyte was detected in both the associated quality control (QC) blank and in the sample.  BC     Characteristics from both 'B' and 'C' qualifiers exist.  BEX    Characteristics from both 'B,' 'E,' and 'X' qualifiers exist.  BN     Characteristics from both 'B' and 'N' qualifiers exist.  BX     Characteristics from both 'B' and 'X' qualifiers exist.

COLUMN HEADING	DEFINITION
BXC	Characteristics from both 'BX' and 'C' qualifiers exist.
C	For inorganics, the analyte was detected in both the sample and the associated QC blank.
CD	Characteristics from both 'C' and 'D' qualifiers exist.
CN	Characteristics from both 'C' and 'N' qualifiers exist.
CX	Characteristics from both 'C' and 'X' qualifiers exist.
D	Analyte was identified in an analysis at a secondary dilution factor (i.e., dilution factor different than 1.0).
DN	Characteristics from both 'D' and 'N' qualifiers exist.
E	Reported value is estimated because of interference.
EX	Characteristics from both 'E' and 'X' qualifiers exist.
J	Reported value is estimated because it was detected at a level less than the RDL or practical quantitation limit (PQL) and greater than or equal to the MDL.
JB	Characteristics from both 'J' and 'B' qualifiers exist.
JN	Characteristics from both 'J' and 'N' qualifiers exist.
N	Result for the matrix spike duplicate is outside of the control limits.
U	Indicates constituent was analyzed for but not detected above limiting criteria which may be any of the following: value reported <0; value reported < counting error; value reported < total analytical error; value reported <= contract MDL, IDL, minimum detectable activity (MDA), or PQL.
UE	Characteristics from both 'U' and 'E' qualifiers exist.
UN	Characteristics from both 'U' and 'N' qualifiers exist.
UX	Characteristics from both 'U' and 'X' qualifiers exist.

COLUMN HEADING	DEFINITION
	<p>X      Specific information associated to the reported value is provided in the hardcopy data report and/or case narrative maintained by the respective project. Additional information may also be found in the RESULT COMMENT field.</p>
LLD	Lower level of detection.
MEDIA	<p>Categorizes samples into logical media groups or subject areas:</p> <p>AT      Air</p> <p>BI      Biota (foodstuffs, wildlife)</p> <p>ER      External Radiation</p> <p>SO      Soil/Sediment</p> <p>SW      Surface Water (also represents water collected from rivers, ponds and springs, and drinking water).</p>
MIN DETECTABLE ACTIVITY	MDA is assumed to be a sample-dependent estimate, typically dependent on the background counts measured by the analytical instrument and sample yield, reported in the same units as the value reported.
OWNER ID	Owner ID identifies the owner of the data (SESPMNT = PNNL SESP routine collection, SESPSPEC = PNNL SESP special study, PNLGW = PNNL Groundwater).
RELATIVE % DIFFERENCE	<p>The relative percent difference between the value reported and the value reported for the replicate sample. The formula is:</p> $100 * (\text{VALUE RPTD} - \text{REPLICATE VALUE}) / ([\text{VALUE RPTD} + \text{REPLICATE VALUE}] / 2)$
REPLICATE ID	Replicate ID identifies the primary (routine) sample number.
REPLICATE VALUE	Replicate value is the value reported for the primary (routine) sample number.
RESULT COMMENT	Result comment contains pertinent information about a result.
SAMP COMMENT	Sample comment contains pertinent information about a sample.
SAMP DATE	Sample date is the date the sample was collected (may also be referred to as SAMP DATE TIME).
SAMP DATE TIME ON	The sample is collected over an interval of time. This is the date and time that sample collection was started.

COLUMN HEADING	DEFINITION
SAMP FROM	Sample from identifies the media-dependent entity that was sampled (e.g., COW, WINE, CARP, etc.).
SAMP ITEM	Sample Item identifies the media-dependent item (e.g., MILK, RED WINE, MUSCLE, etc.) that was sampled from the entity identified in the SAMP FROM column.
SAMP NUM	Sample number is a unique identifier for a sample.
SAMP SITE NAME	Sample site name is the name describing the sampling site and appears exactly as it is identified in the HEIS database.
TAG ID	Tag ID is an identifier used to group the different tissues collected from a single biota sample. For example, a single Tag ID would be used to group the muscle and bone samples collected from a single deer.
TOTAL ANAL ERROR	The 2-sigma total analytical error may be reported for any result.
VALUE RPTD	Value reported is the concentration reported by the analytical laboratory or field parameters obtained during the collection of the sample.

(a) Preliminary daily average Columbia River flow data are provided by USGS.

## ENVIRONMENTAL SURVEILLANCE DATA CY05

## WATER - COLUMBIA RIVER TRANSECTS

NOTE: Lo H-3 results for a portion of September and all of November were not received prior to publication. Missing results will appear in 2006 report.

## ENVIRONMENTAL SURVEILLANCE DATA CY05

## WATER - COLUMBIA RIVER TRANSECTS

NOTE: Lo H-3 results for a portion of September and all of November were not received prior to publication. Missing results will appear in 2006 report.

(a) Three results are reported to ERA, this represents the average of the three results  $\pm$  1 standard deviation of the mean.

(b) ERA known concentration  $\pm$  1 standard deviation.

(c) The Performance Evaluation criteria is:

Acceptable = STL Value falls within the Control Limits.

Not Acceptable = STL Value falls outside of the Control Limits.

The Control Limits, Warning Limits, and Outlier Criteria are established per the USEPA guidelines contained in the National Standards for Water Proficiency Testing Studies Criteria Document, December, 1988.

(a) The Performance Evaluation criteria are:

Acceptable: Bias <= 40%

Acceptable with Warning: 40% < Bias <= 60%

Not Acceptable: Bias > 60%

(b) The Performance Evaluation criteria are:

Acceptable: Bias <= 20%

Acceptable with Warning: 20% < Bias <= 30%

Not Acceptable: Bias > 30%

(c) The Performance Evaluation criteria are:

Gross Alpha - Acceptable: Bias <= ± 100%

(d) The Performance Evaluation criteria are:

Gross Beta - Acceptable: Bias <= ± 50%

(a) The Performance Evaluation criteria are:

Acceptable = Reported Value falls within the Control Limits.

Not Acceptable = Reported Value falls outside of the Control Limits.

Check = Data acceptable but results near acceptance limit so procedure should be reviewed

# **Appendix**

## APPENDIX

### **Errata for the Environmental Surveillance Data Report for 2004 (PNNL-15222, APP. 1)**

The following error was found in the *Hanford Site Environmental Surveillance Data Report for Calendar Year 2004* (PNNL-15222, APP. 1):

Data were inadvertently mislabeled in Tables D.6 through D.9 of the report, located on pages 258 through 261. The tables, which contain atmospheric dispersion factors (X/Q'), were not used for the population or individual dose calculations reported in the main report, *Hanford Site Environmental Report for Calendar Year 2004* (PNNL-15222). The values in these tables were calculated independent of the dose estimates and are included in the report for information only. As such, they do not affect the dose calculations or compliance status for 2004 as reported in the site environmental report (PNNL-15222). Corrected tables can be found in an electronic version of the document (PNNL-15222, APP. 1) on the web at <http://hanford-site.pnl.gov/envreport>.

This same error appears in the electronic version of the *Hanford Site Environmental Surveillance Data Report for Calendar Year 2004* (PNNL-15222, APP. 1) included on the CD with the main report, *Hanford Site Environmental Report for Calendar Year 2004* (PNNL-15222).
