# **Optimize the Autonomous Sensor Fish Device for Understanding Interactions of Aquatic Animals with Marine and Hydrokinetic and Hydro Systems**

CRADA 476

Abstract

June 2021

Daniel Deng

Prepared for  
the U.S. Department of Energy  
under Contract DE-AC05-76RL01830

Pacific Northwest National Laboratory  
Richland, Washington 99354

## Abstract

The goal of this project is to develop technologies for further improving our understanding of marine animal interactions with marine hydrokinetic (MHK) devices and for reducing the cost and time to obtain scientifically rigorous behavioral information of fish around hydro turbines.
