

Pre-Lift Checklist

*This form is to be completed during the pre-lift meeting prior to lifting. Anytime there is an unsafe condition during the lift, pause the job. **DO NOT leave boxes below un-checked.***

Considerations	YES	NO	N/A
Are there potential hazards to persons? (e.g., lifting personnel, suspended over occupied areas, lifting material immediately dangerous to life and health, pinch/crush points)			
Are there hazards in proximity of the work area? (e.g., power lines, electromagnetic radiation/radio frequency hazards)			
Is this a complex lift?			
Weather/wind acceptable?			
Outriggers required?			
Matting acceptable?			
Are ground conditions acceptable?			
Payload weight/center of gravity verified?			
Correct rigging and rigging inspections complete?			
Does the rigging need protection?			
Is there an adverse commercial impact? (e.g., replacement time, irreplaceable, project delay, work shutdown, etc.)			
Field conditions match pick plan?			
Are there repetitive lifts? (distractions, fatigue, inattention, or lack of concentration)			
Verified daily crane inspection has been completed (documentation provided)			
Site control and necessary barricades in place?			
Communication methods established?			
All certifications verified?			
Are attachments secure?			
Verified load charts and counterweight?
