

Doing Business with PNNL

CAMPUS CONSTRUCTION OPPORTUNITIES

Pacific Northwest National Laboratory (PNNL) is one of the Department of Energy's (DOE) leading laboratories for scientific discovery in chemistry, data analytics, and Earth science, and for technological innovation in sustainable energy and national security. In this session of the PNNL Small Business Program Seminar Series, *Doing Business with PNNL*, come learn about upcoming planned construction projects at the PNNL-Richland and Sequim campuses to find out how to better do business with PNNL.

Experts from Acquisitions, Construction Management, Subcontract Management, and Environment, Safety, & Health will be on hand to present valuable information regarding requirements, security infrastructure, and the Hanford Site Stabilization Agreement to better prepare you and your business to be a construction prime or subcontractor with PNNL.

This is a **hybrid** event, both in person at PNNL's Environmental Molecular Sciences Laboratory (EMSL) building as well as streamed virtually via Zoom for those who are unable to attend in person.

HYBRID EVENT at PNNL
Tuesday, April 11, 2023
