Nate Mankovich

Colorado State University
PhD Intern

What is your research area/what are you working on at PNNL?

I'm investigating the geometry of few-shot learning. My research at school has been regarding the geometry of data and techniques from data science.

Why did you choose PNNL?

The awesome community and the engaging research.

What are you most excited to learn at PNNL?

I'm excited to gain more confidence in machine learning techniques.

Are you working virtually? What is it like to work virtually this summer?

Yeah, I'm working virtually. It's really easy to have a snack or a cup of tea every hour.

What do you enjoy doing in your free time?

Rock climbing and running.

What are you currently reading?

The Godfather

What is your dream job? Why?

A job where I can do engaging research in mathematics and data science as part of a small, intelligent team. Honestly, this internship is pretty close to it.
