50121: Owner Rebate Sample Interface (SF or MF)

The following content is intended solely for illustrative purposes. Language is not mandatory or prescriptive. The goal is to provide states/program implementers with a conceptual understanding of a proposed front-end structure and layout. Actual design, navigation, text, and messaging should be customized based on state-specific requirements, branding guidelines, and user experience considerations. DOE recommends a state maintain a single user-interface, even if employing multiple program implementers.

All content must reflect the latest DOE program requirements.

[STATE] Home Energy Rebates Application

The Inflation Reduction Act, signed into law in August 2022 by President Biden, includes nearly \$400 billion to support clean energy and address climate change, including \$8.8 billion for Home Energy Rebates. These rebates will help Americans upgrade their homes with clean energy equipment, improve the air quality and comfort of their homes, and save money on energy bills.

As an owner, you may be eligible for a rebate. Eligibility is based on household income and the type of upgrade. To determine whether you are qualified for a specific type of improvement, please fill in the information below. Within X business days of submitting this application, the state will email you and let you know if your application has been approved or declined.

- If approved, the email will provide additional information on how to proceed with your purchase and upgrade.
- If declined, the email will provide an explanation (e.g., missing information, household income exceeds allowable threshold, specific rebate type already used at the address).

Thank you for your interest in [STATE's] Home Energy Rebates. If you have additional questions, please visit XXXXXX or contact XXXXX.
